

 Deyá idiomas

Translation and software localization for the Spanish- and Portuguese-speaking markets

Deyá idiomas is an Argentinean company that offers multilingual solutions to local and international companies, organizations, government agencies, publishing houses, and universities. Since starting up in 1997, we have specialized in translation and software localization for the Latin American market.

Say it right, on time

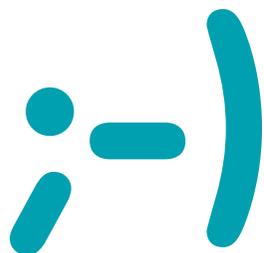

Who we are

The company was founded by translator María Eugenia Deyá in 1997 under the name of CEOS IDIOMA but was rebranded as Deyá idiomas in 2011. In its early years, it focused on the legal, banking, accounting, and finance sectors, working in English, Portuguese,

Spanish, French, Italian, and German. The company then expanded its scope and began providing language solutions for IT, the vehicle industry, engineering, human resources, marketing, art, tourism, entertainment, and medicine, and also added Dutch, Chinese, Thai, and Arabic to its range of languages.

Deyá idiomas has grown steadily since its beginnings and stands out for the effective solutions it provides to the Latin American market. It currently also works with clients from Europe, Asia, and the Middle East.

What we do

Deyá idiomas provides a wide range of international communication solutions: translation, software localization, correction and proofreading, interpretation, training, subtitling, dubbing, and other editorial services, all designed to meet each client's specific needs.

Deyá idiomas' in-house team is made up of an executive director, a human resources manager, an administrative manager, a project coordination team, and a team of translators, editors, and proofreaders who work in Spanish, English, and Portuguese. The company also has an outside team of teachers, translators, editors, proofreaders, interpreters, designers, and engineers who work in various languages and fields. The latest technology and software help us meet all our clients' communication needs.
